Application | Features

Blood pressure mode:
Accurate blood pressure measurement on the upper arm

Faster measurement results thanks to innovative inflation measurement technology – The blood pressure is measured during the inflation of the cuff

Display items: systolic, diastolic, pulse, date, time

LCD display with luminous blue background light

Arrhythmia indicator

Measurements are classified according to the WHO* evaluation system using a traffic-light colour scale

180 memory slots for each of 2 users

Calculates average value of data of the last 3 results

Measurement for guests without storage of reading possible

Test reminder thanks to integrated alarm clock

Very large digits for easy reading

Certified medical device**

Travelling alarm mode:
2 time zones adjustable

Display of date, time, alarm

"Snooze" function

2 alarm settings possible

Alarm with increasing volume

No distracting light when sleeping

Bluetooth® data transfer to VitaDock Online and to the VitaDock+ app for iOS and Android

Compact and space-saving design – ideal for travelling

Mains adapter optional available

With storage pouch

* World Health Organisation
**Certification according to MDD (Medical Device Directive)

Technical Data

Size: approx. 6.05 x 11 x 3 cm

Weight: approx. 350 g

Measuring method: Oscillometric

Measuring range: Blood pressure: 0-300mmHg
Pulse: 40-199 beats/min.

Battery: Lithium-Ion battery

Package Content

Upper arm blood pressure monitor

Cuff for 22 – 42 cm upper arm circumferences

USB charging cable

User instruction manual

Storage pouch

MEDISANA®

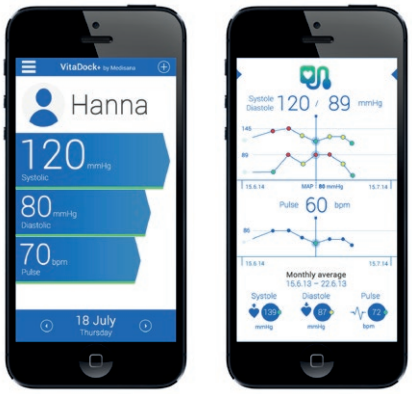
BU 575 CONNECT

2in1-Upper arm blood pressure monitor with Bluetooth
and integrated travel alarm clock

Art.-No. 51296 | EAN 40 1558851296 4

Extended functions with the free VitaDock+ app for iOS and Android

- Graphical representation of values over time
- Synchronisation of the measurement results with VitaDock Online possible
- Easy data exchange via e-mail



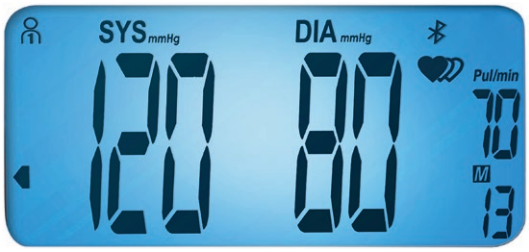
Available on the App Store | GET IT ON Google play | Bluetooth® SMART

Compatibility

iOS: iPhone 4S and newer, iPad 3 and newer.
Android: devices supporting Google Android version 4.3 and Bluetooth 4.0.

Faster measurement results thanks to inflation technology

The blood pressure is measured during the inflation of the cuff. The device detects the systole and the measurement is completed earlier than using conventional measurement methods. As a result, an unnecessarily excessive inflation pressure in the cuff is prevented.



High-quality LCD display with bright blue background light

With its bright blue background light and the black digits the large LCD display provides optimal readability.

Data transfer to VitaDock Online

powered by T

With the new VitaDock Online portal you can now store all your data online and syncronise it between multiple iOS and Android devices to have access to it anytime and anywhere.

- Enhanced security, encrypted data transmission
- Synchronise (e.g. between iOS and Android devices)
- Data backup through online storage
- Share your data with the doctor or on online portals
